1949 Catalog of Fruits

Most popular early strawberry variety ever originated.

A Townsend speciality for 32 years, since introduced at Belchertown, Mass. Our planting stock is of the original strain. Our method of Plant Selection has kept Townsend Premier, the "largest yielding Strain grown today." Many of our customers report harvesting at the rate of more than 1/2 quarts of berries from each original plant set.

STRAWBERRIES

Famous

Streamliner

CERTIFIED Select Strain VARIETY

Everbearing Streamliner, best quality and highly productive variety, is a definite 'must' for every complete garden. Yields extra large, beautiful red berries in early mid-summer, 10 weeks after planting, and continues to the frost season. Townsend Nurseries, Inc. select strain of this famous strawberry variety invokes praise from coast to coast, such as "... probably the very largest of all strawberries," "... delightfully sweet and flavorful, too," "... solid red color, all the way through," "superb for canning — excellent for freezing," "... so firm," "... incomparable skin texture," "Productivity? Say, I'll take all I can get!"

Guaranteed Free of Disease

One FIELD of Our Huge Streamliner Plantings
Dear Friend:

I like to think that each of our customers is a friend. I'm sure this growth that reflects the confidence placed in us by you and thousands of other users of our products all over the country! Our tremendous volume of business in 1949...we are the World's Largest Growers of Strawberry Plants...has enabled us to staff our organization with the finest Nurserymen and Propagating experts available, packing house as to allow us to give each and every order, regardless of size, the prompt and individualized attention that Townsend Nurseries "satisfied customers" have a right to expect.

Half a century of accumulated "Know-How" goes into the propagation of our famous Select Strain varieties...your assurance of healthy, productive growth under the personal supervision of L. Sherman Townsend, and our pride to our unparalleled record of having filled large and small orders faithfully with guaranteed true-to-name varieties that are sure to arrive in a vigorous, ready-to-grow condition.

We've been fortunate during the past year in that weather conditions have been highly conducive for the production of the best plants. So, regardless of real quality, Select Strain, energetically vigorous and heavily rooted berry plants to ship "at no increase in prices of a single item", and proven varieties that pay off in bumper crops for commercial growers that have bought our Townsend Select Strain Plants, you'll be shipped only with our "Money Back if Not Satisfied" guarantee. We do not meet with Townsend standards. We have only one grade "The Best".

It is a pleasure for us to serve our old customers, and if you have never ordered from us, all we ask is that you give us a trial order. We're confident in our ability to make you another Townsend Satisfied Customer."

Sincerely yours,

L. SHERMAN TOWNSEND, President

Townsend Nurseries, Inc.

1949 INDEX

Buy Direct from one of the largest Growers and Shippers of Nursery Stock in the country. Top Quality Plants and Trees at reasonable prices.

"ONLY WHEN YOU HAVE THE COMBINATION OF HIGH QUALITY AND LOW PRICES DOES REAL VALUE EXIST"

L. SHERMAN TOWNSEND
WHEN you purchase Townsend plants you know that you are going to receive plants that are disease-free and just waiting to demonstrate the vigorous, healthy and vitalized growing properties that 47 years of growing experience can produce. Tens of thousands of satisfied customers enable us to operate one of the largest growing and shipping businesses in the world. We, in our turn, endeavor each year to show our appreciation of this confidence entrusted in us by selling only plants that are authentically true to name and reflect our reputation by being the best plants that money can buy. Streams of letters from satisfied customers continuously praise the hardiness and the superior yielding qualities of Townsend plants. There is no secret behind these proven facts. You will find that Townsend Select Strain plants of approved varieties, will provide you with increased yields also.

We Will Help You Get Started
Since our best recommendations are not written—but grown—we are very definitely interested in the results that you get with our plants. We want to number you along with other thousands of satisfied customers, so allow us to make your problem ours. Even an inexperienced grower can enjoy the satisfaction (and profit) incurred by growing bumper crops. Ordinary care by you, coupled with the 47 years of growing experience that is behind the instruction under Culture Directions on Pages 6 and 7 by us, can get you the desired results. Any instructions we have failed to include will be gladly sent to you, free of charge, upon request. We also issue a complete culture guide. This booklet is free and yours for the asking.

Our Packing Method
When you order your plants from us, you are assured of receiving your order in a fresh, growing condition. The management of Townsend Nurseries has not spared any expense on research work pertaining to the shipping of perishable plants. Our NEW MODERN PACKING HOUSE, with CONTROLLED STORAGE assures our customers beyond any doubt that our plants are kept fresh, from the hour they come from the fields, until they are pre-cooled just before being delivered to the customers. Each company enroute to you. Plants are packed into light (but desirable) packages and ventilated to enable the moisture and to keep the plants perfectly cool while in transit.

Fibrous Roots
The fibrous root system is an important factor in getting a 100% stand after setting. To grow such a plant, proper soils and plant food must be used such as that on our plant farms. Our forty-seven years of experience in growing berry plants has given us valuable information on growing a properly balanced plant—one that will grow and produce the yields you have a right to expect.

Prompt Service
Quick Deliveries
One and a half million plants a day... that's our daily digging capacity! Weather permitting, our large crew is on the job 24 hours a day throughout the shipping season. This immense productive capacity is your guarantee of prompt attention and shipment of your order, regardless of size. A trial this year will convince you that with us, SERVICE is much more than just a word.

Clean Trimming of Plants
Makes Easy Setting
Plants received from the nurseries well trimmed, not only save the grower's time when setting, but also saves them extra transportation charges that must be paid for excessive decayed foliage on improperly trimmed plants. There is very often the added loss of the plants themselves, caused by the heating of this foliage in transit, which in many cases bud decay or dried roots. This thorough cleaning of all plants is an important part played by our experienced plant diggers each year, and helps our customers to get big yields of quality fruit.

fields, until they are pre-cooled just before being delivered to the transportation companies enroute to you. Plants are packed  
into light (but desirable) packages and venti- 
lated crates. A portion of fine, cool damp spagnum moss is placed around all the roots,  
to preserve the moisture, and to keep the plants perfectly cool while in transit.

Fibrous Roots  
The fibrous root system is an important factor in getting a 100% stand after setting.
Townsend's Select Strain
Plants Are PROTECTED
By This Trade-Mark

OWNSEND Nurseries, Inc. is the old original
Townsend establishment, which business has been
active for 49 years, and are the world's largest
growers—shippers of berry plants. Do not confuse this old rela-
liable Nursery with others of similar name.
You take no risk when you mail your order to Townsend
Nurseries, Inc. "Our Trade Mark and broad Guarantee pro-
tects you."

**TRUTH**
The good name of this firm and
good will of its customers have been
built and preserved by always hand-
ling nothing but the highest grade
stocks available. Every plant or tree
is the best that can be produced.

**QUALITY**
Old customers know that they will
always get the variety they order.
They have faith in us and we will
not break it.

**HEALTH**
Every plant we ship is healthy,
thrifty, and free from all injurious
disease. Diseased plants will pro-
duce dividends for neither you nor us.

**PRODUCTIVITY**
Every plant that goes into our propa-
gation fields is selected for its heavy
fruiting crowns. In this manner our
stock is kept on its high level, in
both productivity and vitality. All
plants are carefully packed so that
you receive them in condition to
grow strongly and to produce as you
have the right to expect from plants
bearing the original Townsend Trade
Mark. Any stock received by you
that does not meet these high stand-
ards will be replaced free. It is also
understood and agreed that in no case
will we be liable for any sum larger
than the purchase price.

We Pack Goodwill in Every
Bundle of Plants We Ship!

For almost half a century the name of Townsend has been synon-
ous with "square deal," value and top quality in the nursery
business. We have tried to pack confidence into every pack-
age of plants that we have ever sent out. As an indication of
the effectiveness of this extended practice, a
good will, unparalleled in its extent, has
been established almost from the very be-
ginning. In order to hold this enviable
position, Townsend must continue giving
the same "square deal" every time you
come to us with your order.

* In no case will we be liable for any
amount larger than the purchase price.

---

**OUR GUARANTEE**
Every plant shipped by Town-
seeds is guaranteed to be
strictly first class, true-to-name,
free from all injurious diseases,
and carefully packed to reach
you in a good growing con-
dition. Any stock that proves
otherwise we will replace free
of charge.*

TOWNSEND NURSERIES INC.
Salisbury Maryland
Still the Greatest Commercial Early Berry of Them All

PREMIER

NOW -- ONLY $11.95 per 1000 in 5000 Lots

Our Strain of PREMIER is True-to-Name, Double Inspected, State Certified!

Every bundle of Townsend's Premier has been double inspected and certified by the Maryland State Dept. of Entomology. Our strain of Premier is direct from the original planting and has been consistently bred each year for heavier yields. Our new ground planting of Premier is one of the largest in the country—the quality has never been better. If you are seeking bigger, heavier yielding crops of large fine fruit, plant Townsend's original strain of HEAVY YIELDING PREMIER. We will reserve plants for you, digging and shipping whenever you are ready.

COLOR—An attractive, bright, scarlet red, capped by a colorful green calyx that serves to accentuate the berries' color when eyed by prospective buyers.

SIZE—Uniformly large, and under favorable growing conditions, the berries run to extra large sizes, holding up well throughout the entire ripening season and up until the last picking.

FIRMNESS —Classed as a long distance shipper where trucks are employed, Premier is ideal for the market gardener because of its lasting firmness.

VIGOR —Premier is a strong healthy grower, making a good fruiting bed on a wide range of soils and climatic conditions.

QUALITY —A constant demand over a period of years serves to rank Premier among the foremost for flavor and quality. Recommended for home use, local sales or commercial markets.

SEASON OF RIPENING —Premier berries are among the first varieties to ripen, and comes on the market when other strawberries are practically non-existent or in their earliest stages.

FROST RESISTANT —Premier is practically immune to late spring frosts. This is due to the peculiar plant growth which it makes, almost completely hiding the blossom and protecting it from severe cold.

MILLIONS OF SELECTED STRAIN PREMIER ARE GROWN ANNUALLY AT OUR PLANT FARMS

HE Premier strawberry is still the queen, and retains its popularity with thousands of individual growers because it puts a big crop of fine appearing berries on the market first every time, and does it under climatic conditions that often kill other varieties. No other variety can supplant Premier for all around superiority. Superiority as a money maker. Superiority inasmuch as Premier eliminates crop failure, and by fruiting and ripening days and often a week earlier, Premier never fails to command—and get—the highest price. Premier has everything that its name implies, and by our select strain method of growing, we have maintained all of the high qualities that made Premier the immediate sensation of the strawberry world when it was first introduced, and has kept it there ever since.

FAIR—TREATMENT
BIG—YIELDS
"AT NO EXTRA COST"

Adams County, Pa.
Aug. 16th, 1949
Mr. L. Sherman Townsend
Townsend Nurseries, Inc.
Dear Sir:
Kindly book my order for 20,000 PREMIER strawberry plants for Spring 1949 delivery. Understand that berry plants will be short for '49 planting, and we don't want to be left on TOWNSEND PLANTING STOCK.

Picked rate of about 16,000 quarts berries per acre from your plants last Spring Harvest. Have good prospects for coming season. Thanks for the personal attention you give orders, as well as the very reasonable prices for your higher quality berry plants.

Yours Sincerely, O. D. D.
ORIGINATED several years ago by the U. S. Department of Agriculture, this hardy strain has achieved remarkable popularity in states south of the Mason-Dixon line and as far north as Pennsylvania and the Ohio Valley. For an early, solid production that will be both economical and profitable, the Blakemore should be your outstanding choice. It is so sturdy that it will withstand heavy rains with small loss of fruit, so enduring that heavy plant growth can be accomplished in practically any soil, and vigorous enough to withstand more abuse and neglect in growth, picking or shipping than any other variety. The fact that the new yellow resistant Blakemore is held in high esteem is unquestionable. The sensational evidence is in the survey that revealed twice as many acres are planted in Blakemore than any other variety. As a matter of fact, 25% of all commercial strawberry acreages are planted in Blakemore.

As a scientific cross between Premier and Townsend's Missionary, its sizing is from medium to large fruit. Its yield is abundant. The fact that 80% of its crop is produced one week after the first picking makes it invaluable to producers of large quantities for the extra-early market.

The perfect commercial berry, it's tops in choice by canners and preservers. Because of its firmness, Blakemore can withstand long distance hauls and maintain its robust appearance. We reserve plants on order and ship when your order is ready. NOW.

Our Loss is Your Gain--Here's Real Value In

SURPLUS STRAWBERRY PLANTS

As is the case in any other business where large quantities of diversified types (or varieties) of products are concerned, naturally a slight overage or surplus is realized. Since our business policy does not allow us to carry plants that have already been dug over to the next day, we must dispose of this surplus. We, therefore, are in a position to make this potential loss of ours your gain. The grower who is not especially particular about varieties can buy these plants at a sensational and tremendous saving. Every plant is freshly dug, labeled, and true to name. Because of these low prices, we regret that we cannot assume any responsibility for variety selection—please do not ask for particular varieties.

EVERY BUNDLE LABELLED
AND OF APPROVED VARIETIES
Sparkle

New

Truly Magnificent!

A Mid-Season Berry

for Home and Market

Developed by the New Jersey Agricultural Station

IN OUR 1948 Catalog we stated that SPARKLE was in its infancy—now we can state definitely that this is quickly developing as one of America's outstanding varieties. Sparkle has captured the praise of large strawberry growers, particularly in such states as New York, New England States, New Jersey, Pennsylvania, Ohio, and West Virginia. Sparkle has been used with great success in certain parts of these states where Catskill does not produce sufficient fruiting beds for a large commercial crop of mid-season berries. Sparkle is a beautiful growing plant, making a fine fruiting bed on almost any type of soil. Be sure to include some Sparkle plants in your 1949 settings.

This Field Yielded Average of 8740 Quarts of Sparkle Berries per Acre.

QUALITY—Berries firm, flavor is rich, beautiful sparkling appearance.

PRODUCTIVITY—One of the largest producers in the strawberry field, Sparkle ranks with Premier-Temple and Catskill.

SIZE—On fertile soil with plenty of moisture, Sparkle is larger than Catskill. Average conditions the variety is somewhat smaller, and the grower should not let the fruiting bed make too heavy of a matted row of plants where larger berries are wanted.

DISEASE RESISTANT—Sparkle is immune to red stele root disease which some soils are plagued. Truly a variety for Ohio, New York State and some parts of New England where this red stele disease has been found. Sparkle will grow and produce where other varieties fail.

WORLD'S LARGEST GROWERS OF STRAWBERRY PLANTS

MIDLAND

Sensational Vigorous Grower!

The New EARLY BERRY

MIDLAND, first introduced in 1946 on a purely experimental basis, has proven itself to be an all-around superior early variety well worth your investment. Especially recommended for quick freezing. Our reports from various sections of the country warrant us in highly endorsing Midland to customers who have learned to rely on the Townsend Nurseries' word.

We Report to You as Follows:

OHIO — Plants strong grower, berries extra large, big cropper.

KANSAS — Plants vigorous grower, berries large to extra large, does not make as ready a fruiting bed as Premier.

MISSOURI — Larger berries than Premier, about the same in yields.

WEST VIRGINIA — Likes MIDLAND, for extra large berries, and heavy producer.

PENNSYLVANIA — Midland seems to do better on the lower fertile soils of this State, than the average variety of the same season. For average Pennsylvania soils, PREMIER is preferred for the early variety.

NEW YORK — Midland has had a little frost trouble in this State on the very early blooms. Folks like the large bright berries.

NEW JERSEY — On light soils not so good — heavy soils the berries are large and bring premium prices.

NEW ENGLAND STATES — Still prefer PREMIER — as a whole for the early variety. Have some very outstanding reports for MIDLAND in the States of Connecticut and Massachusetts.

MIDLAND Succeeds Where others fail!

• QUALITY — Has rich strawberry flavor, not too sweet and certainly not classed as a sour berry.

• SEASON OF RIPENING — Early, about same season as PREMIER.

• VIGOR — Makes a strong fruiting plant, rather than a matted row of small plants. A beautiful growing plant.

• SIZE — Berries average better than large, with 18 to 28 select berries filling a quart basket.

• FIRMNESS — Extremely firm berries, can be shipped long distance. Berries have that fresh look 2 to 3 days after picked. Ideal for market.

• FREEZING — One of the better varieties of strawberries for quick-freezing — where you want the berries sliced before freezing.

• PRODUCTIVENESS — Produces tremendous heavy yields. Reported as much as 2 quarts of berries from each plant originally set.
Developed from a cross of Royal Sovereign X Premier (Howard 17) by the U. S. Dept. of Agriculture. This relatively new variety has rapidly attained widespread popularity in every berry growing section in the country. Taking its place high in the ranks of leading early berries, Dorsett strawberries are widely planted in every state in the union. Commercial growers know that its ready adaptability to almost any type of soil; its vigorously abundant growth (assuring good crops even in poor seasons) make Dorsett the kind of berry that comes through with paying crops. Its rich, attractive, bright red color, and its ability to retain firmness long after picking, makes Dorsett an excellent shipper (even over exceptionally long hauls) and the kind of strawberry that buyers pay more for. Each year more and more growers find that Dorsett strawberries are one of the best profit yielding early berries that is possible to grow. To meet the ever growing demand for Dorsett, Townsend grows one of the largest plantings in the country. Literally millions of Townsends' Select Strain Dorsett are grown annually. (Note: the above photo shows a twenty acre block of new-ground grown Dorsett), and shipped to Dorsett-wise growers the Nation over.

**DORSETT HAS EVERY DESIRABLE FEATURE!**

Townsend's Select Strain Dorsett are Double Inspected, State Certified and true to name. Popular as an early ripening, big and regular crop, this "in demand" variety has been bred for larger yields. Regardless of how large or small your order may be — — send it in. We will be glad to service it for you. We can reserve plants and ship when you are ready to set.

Price List on Page 52
A large acreage of Certified Fairfax developed under the personal supervision of Mr. L. Sherman Townsend

Famous for Heavy Yields in the Early Market

YOU can tell the worthiness of any variety by its continued popularity. Sensational rise in sales of Fairfax has served as a barometer-like indication of the admirable results enjoyed by growers of this fine berry. Much of this success is undoubtedly due to the rugged hardiness of Fairfax. Even during seasons of drought, this variety will continue to thrive and produce money-making crops when other strawberries fail to survive. Leading all others in firmness, Fairfax is ideally equipped by nature for shipment to any part of the country, and its honey-sweet flavor has earned Fairfax the reputation of being "the most deliciously flavored of them all." Behind our recommendation of this variety lies years of careful plant selection that makes this variety more than equal to any berry for commercial planting. Devote a goodly portion of your acreage to Fairfax, thus insuring yourself a good crop of desirable strawberries regardless of weather conditions.

TOWNSEND'S Select Strain Fairfax are Double Inspected and State Certified to be true to name, and recognized by leading growers as the heaviest yielding strain grown. Let us reserve some of these plants for you. We will ship whenever you are ready to plant.

FAIRFAX is Superior Because

QUALITY is so outstanding that Fairfax leaves nothing to be desired.

Firmness plus is the word for Fairfax. Ideal for commercial marketing.

Flavor that is truly delicious. The finest eating berry on the market.

Productivity that more than compares with such popular beauties as Dorsett and Premier.

Size of fruit is very large and very uniform. Brings "top dollar" on any market.

Vigorous in its growing habits, Fairfax is noted for its abundantly flourishing foliage and hardy root system. The long and fibrous characteristics of its root system accounts for the amazing growth of Fairfax even under drought conditions.

A GROWING FAVORITE with Commercial Growers BECAUSE IT'S A

SEVERAL years ago, the northern half of this country found itself locked in
the throes of a very serious plant disease. This disease, known as the Red-
Steure root rot, played havoc with the then growing strawberry crops, and as
a result, acre after acre of plants were destroyed. With the help of Professor
C. E. Temple, of the University of Maryland, a new variety of strawberry plants
evolved from the cross-breeding of plants that were the most resistant to the
disease. This work has been carried on cooperatively by the University of Mary-
land and the U. S. Department of Agriculture, whose efforts finally produced this
grand, disease resistant variety. As an acknowledgment for his part in the pro-
ducing of this berry, the new variety bears his name—Temple.

BRED FOR HEAVY YIELDS • IMMUNE FROM DISEASE

Quality — Peerless and unsurpassed by any variety on our lists. An attractive
looking deep red with excellent keeping qualities. Firm and admirably suited
for shipment.

Size — Noted for its extra large fruit that is further accentuated by a rich look-
ing dark green calyx. It is generally referred to as one of the most attractive
looking of all strawberries.

Production — Being the result of a cross between Aberdeen and Fairfax, both
of which are outstanding for their growing habits, Temple therefore naturally
possesses the vigor and vitality of its parents. Its foliage is a beautiful dark green
and is resistant to leaf spot. The new Temple can be classed as a free plant
maker and is an extra heavy yielding variety coming into fruit about the same
time as Dorset, and a far better shipper than Dorsett. Thus, we conclude that
with commercial growers, the new Temple will eventually take the place of
Dorset,

- DEEP FEEDER
- DROUGHT STRAIN
- GOOD PLANT STRAIN
- HEAVY YIELDER

"WE ASSURE YOU THAT IT WAS OUR PLEASURE—TO RECOMMEND
TEMPLE"

Delaware Co., O., July 7, 1948
Mr. L. Sherman Townsend
Townsend Nurseries, Inc.
Dear Sir:
You were correct about the TEMPLE berry for our locality. Our 1947-48
crops where bigger than ever off of Temple, than when we grew other vari-
cies years ago. We have disease in our soil, where other old varieties fail
to grow. You certainly kept us in the berry business when you recom-
ended TEMPLE.

Look for many orders from this sec-
tion next year. Its a pleasure to recom-
mand You, and your plants.

Yours very truly, F. L. Voss
Catskill—The sugar flavored strawberry proclaimed as the heaviest yielding mid-season variety. The rise in popularity of this highly productive berry has been nothing short of phenomenal. Its fame with growers as a “super cropper”, and its large, bright, shiny red fruit, has established for Catskill the highest record among all marketable, mid-season berries. Its adaptability to a wide range of soils and climatic conditions has served to further make it an all around favorite. While our strain of Catskill is direct from the originators at Geneva, New York, we have, through careful plant selection, produced a strain that is considered by some of the largest growers in the country to be far superior in vigorous growing habits and heavier yielding qualities than any other strain of this same variety. In recommending this variety, we do not hesitate in assuring you that our strain of Catskill is one that is certain to prove more than satisfactory.

Superlative for Canning and Freezing

RICH COLOR—Bright, shiny red, similar to Big Joe. A double cap of green and its size and coloring make an attractive looking appearance when offered to the buyer.

SIZE—The extra large size of Catskill, from a commercial grower’s standpoint, is undoubtedly its greatest attribute. This fact makes Catskill a more than outstanding value, and causes it to demand higher prices at market time. Catskill keeps its size well until the last fruit is harvested.

QUALITY—Its very fine texture, and its ability in holding up well after picking, makes this variety an admirably suited berry for long distance shipping—a fact that is appreciated by berry growers. On a par with such outstanding berries as Premier, Dorsett, Fairfax, Chesapeake and Big Joe, the flavor of Catskill makes it a much-in-demand commercial value.

PRODUCTIVITY—Big profits in every state east of the Mississippi—and in several states west, have lent substantial support to the general enthusiasm voiced by growers of this prolific variety. Due to results realized in our own test plots, we heartily agree with these growers that Catskill is the heaviest producing mid-season variety ever grown. We cannot see how any grower can fail to make big profits. Nothing short of an outright calamity can keep Catskill from coming through with bumper crops.

FAVORITE in Pa., N. Y., and New England States

EVERY home garden as well as farm should have Fairpeake strawberries growing. A cross of the top flavor berry Fairfax and Chesapeake, an old favorite late variety, we believe that Fairpeake has taken the place of Chesapeake as a top quality late variety, for most growers. We recommend Fairpeake for a new top quality strawberry.

VIGOR — Strong vigorous grower producing big plants, with large leaves.

SIZE — VERY, VERY LARGE BERRIES, that are beauties.

QUALITY — Tops in flavor, produces more than Chesapeake.

FIRMNESS — Good shipper, sound berry. Like moist soil.

GANDY

TOWNSEND'S STRAIN OF GANDY FAR AHEAD OF OLD STRAIN IN YIELDS AND QUALITY

IN THE early days of Gandy, just after it was originated in New Jersey several years ago, its production was not quite as good as has been expected. However, we soon remedied this situation by Townsend selection of our heaviest producing plants and using them for propagating stock. As a result, the productive capacity was more than doubled within a very short time. The news of our sensational success spread like wildfire and today our extensive planting of Gandy is one of the largest in the United States. The fruit has always been of good quality and now is really excellent. The quality, size and shipping qualities have always met with instantaneous success wherever Gandy has been introduced. Berries are of wonderful quality, large to extra-large in size; bright red with dark double green caps. Ripening usually takes place about two weeks after Premier and Dorsett.
For twenty-two years this dependable old timer has been coming through with paying crops for growers throughout the country. Ripening at the height of the season just about the time of the last picking of Premier and Dorsett, this variety comes upon the market just when large fancy berries—like Big Joe—can command top market prices. The size and appetizing beauty of this variety and its appeal to the public—an appeal measured in cash returns—has brought Big Joe nothing but continued praise.

OUTSTANDING WITH GROWERS THE NATION OVER BECAUSE OF:

- **SIZE** —Large to very large berries.
- **COLOR** —Rich, beautiful, double green cap.
- **QUALITY** —None better — ranks with the best. Tops for flavor and shipping.
- **PRODUCTIVENESS** —Under favorable growing conditions, cannot be equalled.
- **VIGOR** —Strong grower on most all types of soil. At its best on clay, or well drained, springy loam soil.

PRICE LIST ON PAGE 52
OWNKING stands alone for money-making qualities. From the Atlantic to the Pacific, from Main to Florida, including Texas, Townking stands as the undisputed king among profit yielding late berries. Premium prices, regardless of locality of the market, are always paid for this variety. Its outstanding color, shape, size and appearance are the prominent factors behind its appeal. Without a doubt, Townking definitely stands alone as the most perfect late strawberry ever grown. Cash in on this tremendous planting opportunity. Get your share—give it a trial this year.

Compare These Points of Superiority:

- **PRODUCTIVENESS**—Tops the list of late varieties, for yields.
- **GROWTH**—Produces excellent fruiting beds under ordinary growing conditions. Foliage is free from rust and is dark green color.
- **SIZE**—Berries large to exceptionally large. Appealing and attractive to buyers.
- **COLOR**—A lustrous rich red berry.
- **FIRMNESS**—Excellent for long distance shipping, ideal for roadside market. Remains fresh on vines several days after ripening.
- **QUALITY**—Surpasses Chesapeake, Gandy, Lupton and Big Joe.

Our Customers Recommend Townking! So Do We!
VERSATILITY—Admirably adapted to prosper and thrive in any locality where strawberries are produced. Not only a competitor to such berries as Blakemore, Premier, Fairfax, and Catskill, but definitely superior on many counts. A truly versatile strawberry inasmuch as it flourishes in any type soil, however, like most varieties, it grows best in damp, fertile soil.

SIZE—In comparison to such popular strawberries as the Blakemore and Fairfax, the Polar Queen fruit is oftimes as much as 40 per cent larger and holds its size well, even to the last picking, thus insuring top prices on any market.

EYE-APPEAL—Especially appealing to a buyer’s eye because of its beautiful, bright, shining red color that goes through to the very core; its complete absence of a green tip; its solid firmness and the tendency for the green cap to grow well away from the berry, making it easy to remove. Its solid red color runs well up under the cap showing a minimum of light red. Polar Queen is a combination of outstanding features that can’t be beaten.

VIGOROUS PRODUCTIVITY—Polar Queen makes a strong and healthy fruiting bed on a wide range of soils, and its extra-heavy yields are the talk of the trade.

AN EXCLUSIVE BERRY INTRODUCED BY L. SHERMAN TOWNSEND

Almost instantly acclaimed as the ideal berry for home use or market freezing, Polar Queen (trade mark registered) has more than made its mark since its recent introduction by L. Sherman Townsend. Growers in state after state have been quick to realize the tremendous profit yielding potentials of this truly superlative berry. Specifically developed for quick freezing, Polar Queen is the real Queen of them all. Don’t miss this opportunity to be among the foremost to cash in on an assured profitable planting.

GROW POLAR QUEEN for MARKET and FREEZING

ACCLAIMED BY NEW YORK HERALD TRIBUNE for All Around Superiority

One of the greatest honors that can be bestowed upon any fruit variety was awarded to Polar Queen in February 1948 when the New York Herald Tribune, through its board of leading nursery authorities, printed its recognition of Polar Queen as an outstanding variety in its class! Polar Queen is even superior to such old-time favorites as Blakemore, Premier, Fairfax, and Catskill!

Polar-Queen Plants are sold only for the production of berries. These Plants are not to be used for Propagation by Anyone.
Value cannot be measured by price alone. If quality is lacking, value is destroyed. But when you are offered the combination of low prices and high quality, only then does the value of that product exist.

Townsend's Plants are known the country over as one of the heaviest yielding strains grown

"MANHASSET FARM TRUCK-LOAD BUYERS"
Calverton, L.I., N.Y.
Dear Mr. Sherman:
Plants arrived here yesterday, extremely good looking. More orders will follow.
Heinrich Meyjes.

"PICKS OVER 2 QUARTS FROM EACH PLANT SET"
Cleves, Ohio
Dear L. Sherman:
Cannot praise your PREMIER and TOWN KING too highly. Picked over 2 quarts of berries from each plant originally set. Customers have already placed their orders for next season.
Dewey L. Steele

"A TOWNSEND CUSTOMER FOR OVER 15 YEARS"
Lincoln Park, N. J.
Gentlemen:
For over 15 years your plants have been satisfactory. Picked from your 3,000 TEMPLE and CATSKILL, berries just swell, sold for over 48 cents per quart.
Francis Hageman.

OWNSEND NURSERIES, INC., are known the country wide, for better quality plants that produce bigger crops at no extra cost. Careful plant selection by our Mr. L. Sherman Townsend, has made the Townsend Nurseries, Inc., the "world's largest shippers of berry plants," plus tops in service, and fair treatment at all times to our customers.

A few letters we are printing on these pages, we have thousands more in our files, of satisfied customers.

"YOUR ORGANIZATION IS TOPS"
York, Pa.
Dear Mr. L. Sherman:
Will you accept my thanks, and I must say that your organization is tops, and will remain that way with such fine treatment as accorded me. I will surely recommend Townsend Nurseries, Inc., to my friends.
Don F. Strong

Our Mr. Humphrey's inspects a field of over 5,000,000 Select-Strain Plants.

Another Field of Top Quality Fruit Trees
TRAWBERRIES are the first fruit to ripen in the Spring. Nothing is more delicious than fresh picked berries from your own garden. What is nicer than to have a nice size strawberry patch coming along in the Spring before any other crops are ready to harvest, to give you extra cash income. Be the strawberries in a garden plot or an acre on the farm.

Our new improved varieties, make it easier than ever before to grow strawberries for pleasure as well as profit. You will find our culture instructions (shown in this catalog) very easy to follow. Why not plan to plant berry plants this Spring? If there are any questions, please write us, we are here to serve you, as we have helped thousands of others get started growing fruits.

BIG PROFIT-MAKING FALL-BEARING GARDEN

PROPAGATED UNDER IDEAL CLIMATIC CONDITIONS

Salisbury, Maryland, long established as the largest strawberry propagating center in America, has held this coveted position because of its ideally situated locale. Located on the Eastern Shore of Maryland 30 miles from the North Atlantic Ocean, Salisbury is subjected to varying intensities of climatic conditions throughout the year. Therefore, it can be readily understood that anything that can be propagated in this particular locality, can be successfully grown in any other part of the country — permitting, of course, the presence of the proper type of soil. Our plants are preferred by growers in Maine, New Hampshire, Canada and other areas where temperatures drop to 20 degrees below zero. Townsend Nurseries, Inc., located in Salisbury, is the largest growers and shippers of strawberry plants in the world. Any nursery product bearing the Townsend label has to be the best obtainable, because Townsend’s 48 years of Nursery experience stands behind every product.

EVERBEARING STRAWBERRIES

Select Strain Everbearing varieties. Gem, Gemzata, Streamliner, New Evermore, and Mastodon start making money for you. Amazing? Yes, but profits in the pocket of everbearing-wise growers cannot be denied. After the plants are set in early Spring, they fruit the entire Summer, continue through the Fall, and fruit heavily again in the Spring. Who could ask more? Townsend’s everbearers give so much for so little in care and expense. No home garden or commercial grower’s acreage is complete without these famous everbearers.

JUST think . . . within a few short months after your plants are set, you are ready to pick big, dark red all the way through FRESH STRAWBERRIES! And, best of all, you can continue to pick them from —

JULY until NOVEMBER

These rugged, everbearing varieties have literally taken the country by storm. Remember — with these varieties you do not have to wait a year for fresh berries.

POPULAR EVERBEARING

G E M

One of the finest everbearing varieties of recent introduction, and a true "gem" of nature. The fine flavor and rich quality of this berry promises to establish it high in the ranks of everbearing leaders in short order. Gem is a heavy yielding, rugged plant maker, and in its long season of ripening, it fruits extra large, rich red berries that can't be equalled. Especially adapted for planting in northern states, this variety also flourishes as far west as Missouri, and produces during a long season—well into freezing weather.

A BOWL OF DELICIOUS GEM

NEW EVERMORE

KEEPS WELL AFTER PICKING

Developed by the Minnesota Experiment Station, the New Evermore is solid red through and through—with a typical spring strawberry flavor—which most everbearing strawberries lack. And too, the New Evermore continues to produce until the snow begins to fly.

Mostodon

THE GIANT THAT REIGNS SUPREME

Still proving itself to be a dependable, profitable investment—year after year—Mastodon's luscious, giant berries stand behind its fame. Just think—you can harvest a crop 10 WEEKS after planting—AND—Mastodon continues to fruit throughout the entire Summer and Fall—AND—then fruits again in the Spring.

NEW GEMZATA

A TRIBUTE TO BETTER BREEDING

The development of a cross between Gem and Wayzata. Gemzata is a definite triumph in plant breeding. Being, in all probability, the greatest everbearing strawberry of all, our recommendation of this variety can only be at its best a gross understatement. Our own method of propagation has undoubt edly brought out the best qualities of this superior berry. The fruit of Gemzata resembles Gem but averages larger, and has a fine, sweet flavor. A vigorous grower, it is resistant to leaf spot and produces constantly throughout the summer months. Gemzata is truly a fine everbearing berry and we recommend it highly.
BLUEBERRIES ARE ORNAMENTAL AS WELL AS HIGHLY PROFITABLE

- **CABOT** (Early) One of the earliest of all varieties, this highly prolific blueberry plant is an established favorite with growers. Its dependable and heavy bearing habits, coupled with the extra large size of its well formed attractive berries, account for Cabot’s popularity. A vigorous grower, Cabot develops naturally to well formed plants.

- **RANOCAS** (Medium Early) This unusually heavy fruiting variety has a tendency to produce extra heavy crops on young plants. In fact, the yield is so heavy that special care must be taken to prune the bushes severely in order to insure a good crop in the following year. Ranocas ripens later than Cabot but earlier than Stanley, and the berries often exceed 19 mm in size.

- **CONCORD** (Mid-season) Often attaining height is excess of six feet, Concord is of upright habit and matures at about the same time as Stanley. Its berries are often three-quarters of an inch in diameter, and when its large clusters all ripen at the same time, they resemble Concord grapes. Concord berries are delicious to the taste, and if allowed to remain on the bush until they are fully ripe, they lose the excessive acidity they possess when they first turn blue. Not only does Concord possess tremendous commercial value, but it is also an attractive, eye-catching, ornamental plant.

- **STANLEY** (Early Mid-season) This grand variety has replaced the Pioneer, blueberry as far as the better grower is concerned. Stanley is a very vigorous, tall growing plant, and is a good pollenizer for other varieties. Beautiful foliage producer of very large berries, that is considered to be the best flavored of all.

- **RUBEL** (Large Mid-season Variety) Recognized as the best of all commercial varieties, Rubel is undoubtedly one of the finest of the wild selections. The bush is upright, very vigorous, hardy and productive. Many of the present hybrid varieties can trace their parentage to this variety. Rubel is widely planted, and a profitable and popular favorite with thousands of commercial growers because of the excellent, though somewhat acidy, quality of its berries, which not only ship well but are in constant demand. With Rubel blueberries as your product—you can’t miss in a profit yielding market.

- **JERSEY** (Season Late) The berries of Jersey are unquestionably the largest of all the varieties, however until dead ripe, they are too acid for the taste of most persons. Jersey is a firm, robust berry that stands up well in transit, and is considered by growers to be one of the leading late varieties. Its light blue berries ripen about one week later than Rubel, and Jersey’s remarkably beautiful growth also makes it attractive as an ornamental plant when grown in any home garden.

Townsend’s Cultivated GIANT Blueberries

Easy TO GROW!

Blueberries can be classed as one of the easiest plants to transplant. For the home planting, set the plants about 5 ft. apart, (for commercial plantings, set in rows 8 to 10 ft. apart and space plants 4 ft. apart down the row). Blueberries require a somewhat ACID SOIL, (ranging in test P.H. 3.8 to 5.5). If your soil is not acid, it may be made so very easily by mixing with some pulverized PEAT and sand, half and half, mix thoroughly with water, and place in hole where the plant is to be set, below the root and above the roots. Fruit ripens over a period of several weeks.

These GIANT BLUEBERRIES—TOWNSEND’S BEST—lead all the rest in profit yields and delicious eating properties. Plant this season and be assured of getting a large yield of choice, luscious berries by next Spring. These select plants bear for many seasons — bigger and better yields each time—thus your first cost covers everything.

The large, delicious berries can be eaten right off the bush, and are ideal for either canning or quick freezing. Plant two or more varieties for cross-pollenization. If you plant for commercial reasons, the fact that these berries will bring up to, and often far beyond, 75 cents per pint will undoubtedly interest you. Blueberries demand and get the highest prices on the fruit market.

KING OF ALL RED APPLES!

Double Red Delicious

Colors Earlier
Grows nearly everywhere
Trees vigorous
Large size
Big cropper
Eye appeal, shape
Good for storage
Extra fancy fruit
Flavor Rich

Finest Flavored Red Apple Grown!

Colors much earlier than the old standard Delicious apple, thus the fruit can be picked earlier while it is quite firm and will keep better in storage.

Large in size, solid red color, and outstanding for its 5-knob end which makes it popular on any market and sells readily to consumer.

Picking season early September and keeps in storage until March. Every home and orchardist should plant Double Red Delicious this year.

YELLOW DELICIOUS
Bears Young - Big Crops!

A SHINING GOLDEN YELLOW

Queen of all winter apples; this grand variety bears fruit young and can be picked in the early days of September. Keeps well in storage until March.

Our trees of Yellow Delicious are propagated from buds selected from a famous early bearing Yellow Delicious orchard, which bears consistently big crops every year.

GOOD REASON FOR PLANTING
1-Bears young-fast grower
2-Disease resistant
3-Big crops every year
4-Top money maker
5-Real appetite appeal
6-Premium prices
7-Excellent polonizer
8-Vigorous grower

Townsend's Improved Strains

APPLES

For Commercial and Home Planting

- **YELLOW TRANSPARENT** Deliciously mild and juicy. Early, and easily the best yellow apple.

- **LODI** Reports indicate that there is a big future in store for this new, extra large summer apple. Lodi bears very young and ripens about the same time as Transparent, however the fruit is much larger and more firm. Early bearing.

- **EARLY McINTOSH** Resembling McIntosh in appearance, but bearing earlier, this firm, appetizing, handsome Red is tops for flavor.

- **IMP. ALL RED JONATHAN** For growers that want deeper color, richer looking Reds, this variety is definitely the answer. Bears a medium sized apple of superlative quality—appealingly attractive, and an excellent keeper.

- **IMP. ALL RED McINTOSH** A definite improvement on already famous McIntosh apples. The color is a solid red and commences to color weeks earlier. Highly recommended because of excellent shipping and storage qualities.

- **GRIMES GOLDEN** Known and acknowledged as the very best home orchard apple, Grimes Golden needs no introduction. Its sub-acid delicious flavoring has been a source of eating delight to those who eat apples raw, and it is unsurpassed for cooking. This variety is golden yellow in color, a Fall apple, firm and highly recommended by Townsend.

**JUMBO TREES PAGE 29**

- **DOUBLE RED STAYMAN** A completely new red addition to the already popular Stayman. Unparalleled for cold storage keeping, and growers can pick a full three weeks before the older Winesap variety ripens. A big cropper and just fine for home cooking or commercial markets.

- **GALLIA BEAUTY** (Red Rome) A solid red, brilliantly colored apple that produces fancy fruit. Remarkable keeping qualities. One of the best, juicy and very large—a real honey of an apple.

- **BALDWIN** Highly regarded as an eating and cooking apple because of its sub-acid and aromatic flavoring. Baldwin for many years has been a popular northern favorite. Recommended highly by our New England customers for its white, mealy flesh and heavy yielding habits, Baldwin has been a winner every time.

**CRAB APPLES**

- **DOLGO** New, unusual fruit of strikingly beautiful, fiery red. Makes ruby red jellies.

- **HYSLOP** Fruits large, excellent for jelly.

FRUIT AT HOME
Hale Haven

Ripens Two Weeks Before Elberta

Popular because of its admirable coloring, luscious, juicy, yellow flesh and free-stone. Excellent shipping qualities and extreme hardiness in bud. This variety is recognized in almost every peach growing locale as "THE BEST PEACH FOR "QUICK FREEZING".

Red Haven

Earliest Yellow Free-Stone Peach

This new and most promising early free-stone that ripens just before the old favorite Golden Jubilee. Bears heavy crops of almost fuzzless fruit. A superbly hardy variety. Red Haven has successfully weathered temperatures as low as 13 degrees below zero, and still borne full crops. It's rich, yellow skin that is almost entirely covered by a dark red flush, and its uniformity of size tend to cause this variety to sell on sight.

Golden Jubilee

None More Delicious

Golden Jubilee has been tried and proven to be one of the most valuable early, yellow free-stone peaches of recent introduction. Supreme flavor, attractive coloring, and firm enough to be classed as a long distance shipper. Tree is vigorous grower; is outstanding for hardiness. Truly an outstanding variety for both commercial and home growers. Ripens four weeks before Elberta.

Our reputation on Strawberry plants has been earned equally as well for our Certified Peach trees. Our infallible system of grading and inspecting is your guarantee of satisfaction every time.

Townsend Nurseries ORIGINAL Select Strain

ELBERTA

America's Favorite PEACH

IT'S A Yellow FREESTONE!

ELBERTA ripens about mid-season. Fruit is large to extra large, yellow flesh, free-stone; skin golden yellow with brilliant red shades and dark red blush where the peach is exposed to the sun. Elberta has been nationally recognized as being the practically perfect peach. Its uniform large size makes it attractive to the buyer. Elberta usually commands a premium price on any market.

Uniform Shape—High Color

- Best Canning Peach
- Supreme Commercial Variety
- Tree Vigorous Grower
- Excellent Long Distance Shipper
- Brilliant Colored, Yellow Flesh
- Rich in Flavor, Large in Size
- Grows in Widely Different Areas
- Dependable Sure Cropper

4 SENSATIONAL VARIETIES

- EARLY ELBERTA—When true quality is desired, PLANT TOWNSEND'S ORIGINAL STRAIN OF EARLY ELBERTA (unusual size too). Ripening about 2 to 8 days before regular Elberta, this splendid variety bears consistently. Its yellow flesh, large sized fruit is made more attractive by its fine skin that bears a soft blush of red. You can't go wrong with this Townsend original Freestone.

- BELLE OF GEORGIA Home canners prefer the "Belle". Known as the most popular of all peaches, this variety ripens in mid-season and is a consistent market favorite. Tree vigorous and highly productive. The best of all white peaches. Ripens 5 days before Elberta.

- BRACKETT Grand for canning and a fine market peach. Excellent quality and a freestone. This variety follows Elberta by about 5 days.

- LIZZIE Late, about 12 to 16 days after Elberta, and a distinctive freestone. In size it is large or larger than Elberta. When a late peach is wanted, Lizzie more than fills the bill.

BE SAFE! PLANT TOWNSEND'S ORIGINAL SELECT STRAIN PEACH FOR SURE RESULTS!
MONTMORENCY  Best Sour Cherry

UNIVERSAL favorite, the only profitable sour cherry to plant regardless of your location. Trees of Montmorency are strong, vigorous, disease resistant, very hardy and usually start to bear fruit in 2 years. Large in size, ripens mid-season, red, slightly acid. Best sour cherry for pies, canning and commercial market.

NAPOLEON (Royal Ann) Sweet Cherry

NAPOLEON  Best golden sweet cherry, known in some localities as Royal Ann. Large in size, sweet delicious flavor, prolific bearer, ripens mid-season.

BLACK TARTARIAN  Favorite in most parts of the country, very large, sweet, purplish black color, rich flavor, bears large crops, ripens early, vigorous grower.

GOVERNOR WOOD  Bears bumper crops, large yellow, sweet flavor. Fruits in mid-season, an old favorite.

YELLOW SPANISH  Large, golden hued fruit attractively tinted with crimson. Ripens end of June—just fine for canning.

SCHEIDT  Large, sweet, black, and fine flavor. Ripens mid-season.

WINDSOR  Valuable late commercial sweet cherry. Hardy, extra firm.

JUMBO SIZE FRUIT TREES - See Page 29

PLUMS

ABUNDANCE (Japanese) Probably the best oriental plum, this distinctive variety ripens late August to Early September, and yields an abundance of aromatic, tender but firm, cherry red, medium sized fruit.

BRADSHAW. Bradshaw's very large sized fruit is constantly in demand because of its large, dark violet red, yellow fleshed fruit that possesses remarkable keeping qualities and excellent shipping standards. Exceedingly productive and a hardy vigorous grower. August ripening.

BURBANK. A triumph of the genius of "The Master Horticulturist." Remarkably successful all over the country. It seems to succeed in any soil. Fruit large, dark red or purplish with thin lilac bloom. Flesh amber yellow with rich sugary flavor. It's a dandy.

FRENCH DAMSON. A large beautiful plum of good quality surpassing all other plums in this class.

ITALIAN PRUNE (Fellenberg). Excellent for drying, preserving or desert. Large size fruit that is firm, sweet and delicious. We have nothing to offer that will take its place. Every home should have a few trees.

STANLEY. Dark blue, with splendid quality for desert or culinary purposes.

**STANLEY**

*(Favorite)*

ALL 2 YEAR GROWN PEAR TREES HEAVILY ROOTED

- **ANJOU.** A late variety that is tops for yield and excellent keeping qualities. Fruit has the finest of flavor and is very juicy. This golden yellow, red cheeked dandy is undoubtedly the most popular pear for both home use and market purposes. Truly fine for deserts or eating raw. If you plant pears, don't miss up on this wonderful variety.

- **BARTLETT.** Resembling Bartlett in fine shape and beautiful coloring, this variety is very hardy and does well everywhere. Its fruit is evenly grained with a fine, rich texture and is sweet and highly flavored.

- **CLAPPS FAVORITE.** (d'Angouleme) Dull yellow and appealingly mottled with russet. Extra large and trees are blast-resistant and very productive.

- **DUCHESS.** Late bearing, extremely hardy, large yellow fruit of excellent quality.

- **KIEFFER.** Its richness of flavor more than makes up for its smallness of size. Very desirable for pickling or preserving. Trees vigorous, bears late.

- **SECKEL.**

BARTLETT PEAR

CHAMPION. Trees very hardy, vigorous grower; fruit large, pear-shaped; skin greenish-yellow; a very good keeper. Trees bear at an early age, fruits late.

ORANGE. Early to mid-season fruiting variety, fruit golden yellow, pale yellow flesh, tender, mild subacid; an excellent variety for North; perfectly hardy.

NECTARINES

SURE CROP. The fruit is large, rounish, white background overlaid with a bright attractive red. Very richly flavored, ripening in late July—early August.

QUINCE

APRICOTS

EARLY GOLDEN. Small pale orange, flesh orange, sweet, good juicy; early productive and hardy.

MOORPARK. Just about the largest apricot grown. Tree large, robust, vigorous grower; Skin tender with specks of orange and yellow, flesh yellow, juicy and sweet; ripens August.
Almost a generation ago, our country was subjected to a very serious tree disease. This national scourge destroyed most of the chestnut bearing trees throughout the Nation.

It gives Townsend Nurseries great pleasure to announce that once again it is possible to harvest your own crop of chestnuts in the Fall. By planting Townsend's Blight-Resistant chestnut trees, you can know the thrill of gathering these meaty nuts—lost these many years—the second year after the trees are planted. Best results for pollination of blight-resistant trees are obtained with 3 trees, although it is possible at times with 2 trees.

Propagated from parent trees which average 38 to 42 nuts per pound (Natural average 75 to 90)

Something New for the Younger Generation

- The sight of these trees once again flourishing cannot fail but to evoke many memories from the older element, whereas they will be something entirely new for the younger people. Of course the pleasure of roaming the woods at Autumn and gathering these tasty nuts is probably gone forever, but this fact does not prevent either commercial or home growers from realizing their own crops.

Any well drained soil will do! Townsend's thoroughly Blight-Resistant chestnut trees are disease free—and easy to grow. These trees require practically no care after once being set, and thrive vigorously in any well drained soil. No spraying is necessary.

Prices

1 to 5 trees - $1.95 each
6 to 10 trees - $1.75 each
11 or more trees $1.50 each

Select Bush Cherries

LARGE, glistening black, sweet, hybrid Bush Cherries. Good to eat fresh or canned. They bear in cold climates, where standard Cherries fail. Borne in great quantities on low-growing bushes. The white blooms in spring make them very ornamental. Leaves color red in autumn. Trim to desired shape and size. Set bushes 3 feet apart. Thrive in any good garden soil, or in the shrub border.

Price: 2-yr., field-grown (Quick-Bearing Bushes):
69c each 3 for $1.79
PLANT TOWNSEND'S HARDY NUT TREES

For Food and Shade

HARDY PECAN
A BEAUTIFUL growing shade tree, as well as famous for top flavor nuts. We have a limited supply of HARDY PECAN trees that are hardy except in extreme northern climate. Shells thin, open easily. Tree strong grower yields big crops. 2 to 3 feet trees $1.85 each; 2 or more trees $1.50 each.

HARDY ENGLISH WALNUT
Vary somewhat in size from the California grown walnut, being larger in most instances. Hardy in CANADA, where the nut falls free from the hull. A heavy producer of top quality nuts, hardy grower, does not need too much room. We suggest two trees for cross pollination. Be sure to get your order placed early supply limited. PRICES: 2½-3 ft. trees, $2.75 each, 2 or more $2.25 each.

PAPER SHELL PECAN
For warmer climates we offer this larger size nut in the paper shell pecan, in varieties Stuart, Schley and Sucess. This type of pecan should not be planted where winter temperatures drop below 20 degrees, for best results. PRICES: 2 to 3 ft. trees $2.85 each; 2 trees or more $2.50 each.

THOMAS GRAFTED BLACK WALNUT
Improved grafted Black Walnut, not to be confused with the old hard shell type. This is a grand variety bearing large meat, in thin shells that are easy to open, top walnut flavor. Bear soon after planted. PRICES: 3-4 ft. trees $3.00 each; 2 trees or more $2.75 each.

CHESTNUT TREES

AMERICAN FILBERT (Or Hazelnut)
Our well rooted, heavily branched trees will bear nuts in two years after planted. Bushy type growth can be planted in the lawn as an ornamental shrub. Bears large crops of nuts, in beautiful bronze and scarlet foliage. PRICES: 18-24 inch, 3 year branch trees $.80 each; 3 for $2.25; 10 for $6.75.

EVERBEARING FIG
Not hardy in 20 degrees temperature, but if winter killed will start again from the roots, thus figs are very widely planted. Bears usually first year planted: large fruits, sweet and delicious; excellent for preserves, canning and drying or eat fresh from the plant. PRICES: 2-3 feet trees $.80 each; 3 for $2.25; 10 for $6.75.

RASPBERRY PLANTS
In 1948

A fine block of Townsend's Certified Cumberland that averaged 5,300 pints of berries first years crop. Get good plants. Treat them right and profitable yields will be yours.

Be Sure to Grow
Cumberland
KING OF ALL BLACK RASPBERRIES

TRULY the breadwinner of the black cap family, this variety is undoubtedly the most widely planted black raspberry grown today. Cumberland's outstanding leadership stems from continued and consistent profits realized by commercial growers year after year. Unsurpassed for market value, this variety's large, plump and tasty fruit has proven itself to be a true family table delight. Cumberland is practically free from seedliness and crumbling, with exceedingly desirable firm texture, which makes it a fine shipper. The ripening season extends from mid-season to late, and its vigorous, hardy bushes are admirably capable of supporting Cumberland's large crop of fruit. Our stock this year of Certified Cumberland plants is exceptionally fine, and we are confident of the fine results that you will obtain from this variety. For a profitable fruit crop covering a long period, plant Cumberland.

NEW LOW PRICES ON CUMBERLAND THE BEST THAT MONEY CAN BUY
BLACK RASPBERRIES

Get in on Profits Yielded From One of America's Most Popular Small Fruits

PROLIFIC fruiting good black raspberry patch cannot be equalled. Black raspberries unquestionably have established themselves as one of the most profitable of all farm crops. This is especially true when you set strong, healthy canes that are capable of maturing large crops. Our Select Strain certified raspberry plants are beyond a doubt the finest obtainable, and will lead the field in almost any respect regardless of the section they are planted in. These plants are "tops" in value, unsurpassed for quality, and a bargain you can't pass up.

Diseased and run out fields average only from 800 to 1600 pints per acre—while healthy, disease-free plants will yield from 3200 to 6000 pints per acre. These figures tell the story. Invest in Townsend's Select Strain certified plants so as to profit from this big difference.

Place your order now. We'll ship when you're ready to set.

FOR LOWER PRODUCTION COSTS and HIGHER PROFITS

New Mammoth MORRISON

MORRISON fruits the largest berries of any known variety — it is firm throughout with a fine rich texture, has less seeds than other black raspberries. A top variety for quick freezing and canning. This, in conjunction with Morrison's tremendous yields, makes it highly profitable variety in any field.

Townsend's heavy rooted raspberry plants are the results of extra care in breeding

SPECIAL OFFER

12 LATHAM
12 MORRISON

ALL FOR $3.25
Latham has been the standard by which raspberries have been judged for years. This Blue Ribbon winner is unexcelled and unchallenged. Unprecedented enthusiasm and a demand that far surpasses the supply, has made this sensational berry a veritable king in the berry world. Latham, without a doubt, is the finest looking berry on the market, and is famous with commercial growers because it produces more berries than any other variety — and does so with an AMAZINGLY SMALL AMOUNT OF CARE.

Sensational profits are a glowing tribute to Latham’s king size, luscious red fruit — so appealing to buyers because of its appetizing appearance and delightful flavor. This tremendously productive variety is a tall, vigorous grower, and planters report that an average of $1000 per acre of plants is realized with Latham. In addition to this, Latham’s firmness and lasting qualities make it an excellent shipper. Free from mosaic, Townsend’s Latham’s is one variety you can’t afford to pass up. Order some today—we’ll hold them until you’re ready to plant. Latham can’t miss — whether you raise to sell or to serve.

1949 NEW LOW PRICES
SEE PAGE 55

Sunrise
Early Raspberry

Bright, glowing red, and extra large berries make this New variety stand out above any other early red-raspberry. Plants are healthy and good growers. Fruit fine for shipping or canning. Introduced by the New Jersey Experiment Station. Supply limited order early.

Chief
READY FOR MARKET WHEN PRICES ARE HIGHEST

HIEF ripens 10 days earlier than Latham, the fruit while not quite as large as Latham, is firm bright red color, and excellent shipper, tops for quick freezing and when grown commercially reaches the market when berries are at a premium. And of course, Chief is nearly immune to mosaic and mildew diseases. Like Latham its parent, is an unusually heavy producer. All of these facts add up to an imposing score, and make Chief a good money maker on any market, also a red raspberry which every home garden should have.

Townsend’s Raspberries Are Certified FREE of Disease

Absolutely Hardy — EASY TO GROW

FOR QUICK FRUITING
SEE PRICES ON PAGE 43.
**Pick Berries Summer and Fall!**

THOUSANDS of growers in practically every state east of the Mississippi are reaping sensational profits by being able to harvest and pack berries for market throughout early Spring and the entire Summer and again in the Fall. Amazing? Yet—but it's easy to do when you plant Fallbearing varieties. Townsend's Fallbearing raspberries are easily grown, fruit the very first year set—and continue to do so for a number of years thereafter. Both commercial growers and home gardeners alike have found these varieties to be profitable investments. (To increase Fall production, the new growth should be sheared back about 18 inches after the Spring crop is harvested.)

**Indian Summer**

A tremendous sensation because of its giant size, delicious taste and appealing beauty. And, sensational also in that it bears a bumper crop in June and an immense crop again in the Fall. Its wonderful keeping qualities and its unusually large, glossy red, cone shaped berries have earned for Indian Summer the reputation of being the greatest all-purpose raspberry yet. This variety is certainly a worthwhile investment. Be sure to order a good supply.

**MAMMOTH RED EVERBEARER**

A Distinctive Pair -- Outstanding

**MARCY**

THE BIGGEST YET

Its long, conically shaped, moderately firm and thick fleshed fruit makes Marcy a highly desirable berry as well as an excellent shipper. The plants are tall and exceptionally hardy with stalky canes that hold fruit well. Berries produced in test lots show Marcy to be the largest of all leading varieties.

**TAYLOR**

Favorite of the Future

Its rigid tree-like canes hold its bright red, new oblong shaped, giant sized berries well off the ground. For luscious flavor and crumble-free fruit, Taylor is all that you could ask for. Taylor is dependable and always comes through with heavier yields and greater profits.

They make a much more fibrous rooted plant and grow off much quicker after setting. One planting lasts for several years, and the first crop generally more than pays for the entire investment. After the first crop, blackberry plants grow upright, standing in bunches and often attaining heights in excess of 6 feet. Despite the fact that we sell hundreds of thousands of blackberry plants to commercial growers every year, we sincerely believe that every home garden should contain several of these easily grown plants. Not only will they furnish plenty of big, tasty berries for making luscious cobblers, wines, jams and jellies, but will also enable you to sell plenty of left-overs.

Eldorado

IT LEADS THE FIELD

Famous for being the most widely planted of all commercial blackberries, Eldorado's unexcelled productiveness cannot be beaten. Its fragrant, jet black, large sized, practically coreless berry is in demand wherever and whenever blackberries are marketed. Eldorado does exceptionally well even under extreme cold weather, and you can depend upon this hardy variety for satisfaction far beyond your greatest expectations. Eldorado is a mid-season to late variety and is superb for making pies, jams, jellies and wines.

New Alfred
SUCCEEDS ALMOST EVERYWHERE

Known to have successfully withstood 35 degrees below zero, the New Alfred's hardiness cannot be adequately evaluated. This rugged producer of large, sweet, coreless berries ripens a few days earlier than Eldorado. Alfred's northern locale originisation has made it adaptable to all sections. Growers in all of the northwestern states as well as in Ohio, West Virginia, Indiana, Illinois, New York and Pennsylvania are loud in their praises as of the merits of this new variety. We recommend the New Alfred highly, and in our estimation, for a fine mid-season variety, there is none better.

Early Harvest
The Earliest Of All Blackberries

This variety is unquestionably the most productive of all the early ripening blackberries. Its growth is superlatively abundant and vigorous, and the canes are very hardy. It fruits a medium large but very firm berry that is excellently suited for shipping purposes. For a high quality early blackberry — plant Early Harvest.

Blowers
Always A Profitable Investment

Its vigorous and hardy vine, and its heavy fruiting qualities have established for Blowers the reputation of being one of the leading commercial varieties on the market. Its berries are borne in large clusters and are sweet and melting to the taste. Blowers is a heavy producer — especially in the northern states. Get in on Blowers profits this season. Order early.
NEW BOYSENBERRY
THAT ARE COMPLETELY
THORNLESS
BOYESNBERIES ARE LUSCIOUS

THE GREATEST VINE BERRY FOR HOME — MARKET

SENSATIONAL PROFITS FOR COMMERCIAL OR HOME PLANTING

JUSTLY reputed to be the largest and finest berry ever produced, the Boysenberry is a grower's answer to certain profits. This newest addition to the berry family came as a result of crossing blackberries, raspberries and loganberries. Possessing the best attributes of its parents, the Boysenberry is a veritable giant — often growing more than 2 inches in length, and 1 inch in diameter. Its flavor is a subtle and absolutely delicious blending of its parent berries, and the tremendous yields, plus its excellent crop, spell success for the Boysenberry in a big way. And, tremendously important also is the fact that — it comes into bearing the next year after planting and one planting lasts for many years.

Commercial growers share with home gardeners their enthusiasm and delight in the abundant growth and remarkable quality of Boysenberry. The fruiting season generally lasts for as long as two months and it is not unusual to pick 20 baskets of berries to the plant the second year after planting. We strongly recommend that you give this extraordinary berry a trial. You're bound to be amazed at the results.

- By Far the Largest and Heaviest Producing Berry of the Blackberry or Dewberry Family. • Berries Often Exceed 2 Inches in Length. • 2200 Pints Picked From 100 Two-Year-Old Plants • Average — 35 Berries Per Quart Box! • Gross Returns — $1750.00 From One Acre! IDEAL FOR QUICK FREEZING!

COMPLETE CULTURE GUIDE ON REQUEST • PRICE LIST ON PAGE 55

DEWBERRIES
HARDY
PRODUCTIVE
PROFITABLE

MARKET prices in recent years are reasons why every commercial grower should plant Dewberries. Townsend's Select Strain Dewberry stock is in fine shape this year and just waiting to turn themselves into ready profits for thousands of market growers and home gardeners. The Dewberry is a trailing blackberry and a little less hardy. However, Dewberries ripen much earlier than blackberries, are a much larger fruit, and they have a finer flavor. It has been successfully grown on a large scale in the central and southern states, however since the advent of the Youngberry, the Boysenberry and the Nectarberry varieties, the planting section of the Dewberry has been advanced some two hundred miles north. Growers have been reporting excellent results as far north as Rhode Island and western New York. Due to the very fine texture of Dewberries, long hauls should be avoided and they should be placed on the market soon after picking.

- YOUNGBERRY
A new trailing variety of the Dewberry family. Combining all of the best features of the Raspberry, Blackberry and Dewberry, this new variety has a rich, spicy flavor that is delightful to the taste, and unsurpassed for sheer productivity. Its large, uniform, and practically seedless fruit place it among the highest prices drawing fruit on any market. Excellent for jellies, comping, or eating fresh, Youngberry is tops for either commercial growers or home gardeners.

- LUCRETIA
Remarkably productive and exceptionally hardy, this variety is reputed to be the best of this class of fruit. Lucretia ripens early and its fruit are large, firm and meltingly delicious. Grown successfully and on a large scale in the south, this variety has also been a profitable winner in northern states.

THORNY BOYSENBERRY

Same type of berry as its off-spring, the Thornless Boysenberry the old type does have thorns. Where the planter does not care about picking berries in thorns, then he can save a little in purchasing plants of the thorny type. We have plenty plants.

24 Strong 1 yr. Plants
Special Price $3.45
2 Collections for $6.25

Dear Sirs:
Your Thornless Boysenberry, bear big crops, large berries. Never lost a single plant in 1917 planting.

Lester J. Holmes
The best by far of the new — AND — approved by Townsend's for superior yields, quality fruit, and early ripening habits. All of recent introduction.

**CACO (A Better Red)**
This prolific new, amber red is considered the best and hardest of its kind ever produced. Its bunches are large, and the flavor of its fruit can be compared with the finest for rich, sweet qualities. Holds fruit well after ripening.

**CHAMPAGNE (Richest Amber Yet)**
Being all that its name implies, this new variety is unsurpassed for rich, very fine flavor. It produces large, beautifully colored amber grapes in tight, compact bunches. This variety is destined to become an all around favorite. Its vigorously growing, strong vines fruit at an early age. Champagne is one of the best varieties on our list.

**FREDONIA (A Fancy Black)**
A fancy quality blue-black, and one of the earliest to ripen. Fredonia's juicy, but solid fruit grow abundantly on hardy vines and its large, compact bunches are real money-makers for any commercial grower.

**PORTLAND (White)**
This new variety ripens earlier than any other known grape. Portland's call to fame lies in the taste of its grapes. Its large, beautiful, yellow colored fruit contain so much sugar that they can be eaten long before they are fully ripe.

Townsend's Select Standard Varieties

**The Famous CONCORD (Black)**
This famous, ever dependable, sure cropper variety is the standard by which all other varieties are judged. Regardless of whatever other varieties are grown, no vineyard or arbor can really be called complete without a liberal planting of Concord. For almost a hundred years this old, reliable variety has been a constant money-maker, and it is still referred to as the "King" of all grapes. Its wonderful adaptability to all soils and its ready flourishing under varying climatic conditions go a long way in accounting for Concord's long-time popularity. Concord ripens mid-season to late and is unsurpassed for vigorous growing habits and productivity. For commercial growers, Townsend's winter-hardened Concord stands supreme.

**The Mellow CATAWBA (Red)**
This variety keeps better than other grapes now being cultivated. A late ripening, very sweet, copper red fruit, Catawba is used extensively for wine making.

**MOORE'S EARLY Money-making Black**
Ripening two weeks earlier than Concord, this seedling of Concord is an extra heavy producer of large excellent quality black fruit. It is planted extensively by commercial growers.

**The Magnificent NIAGARA (White)**
Receiving most of its characteristics from its parent Concord, this magnificently flavored, white grape is a true off-spring of the "King". Its impressive, compact clusters ripen with Concord.

**The Heavily Fruiting WORDEN (Black)**
This ever popular, thin skinned variety is famous for tremendous yields, and is one of the earliest ripening of all varieties. Excellently flavored, Worden is a hardy growing, bluish-black variety.

**Big Value Grape Offers**
Select varieties to give you a fine all-around high quality grape garden. Perfect for ornamental effect.

**ALL 2-YEAR SELECT VINES**

2 YEAR GRAPE VINE LIST ON PAGE 55
BEARING AGE VINES ON PAGE 43
SELECTED For Quicker Results

**Fruits The First Season**

By the time we have transplanted Bearing-age plants into our nursery rows, we have grown them a full year under the most idealistic growing conditions possible. A special twenty acre irrigation system nurtures them from original setting until transplanting, and in order to guarantee our customers well balanced, healthy plants, plenty of humus is added to the soil before setting. Cultivation and pruning is carefully carried out throughout the entire season, and a carefully supervised method of tying, bundling, and wrapping (the full length of the cane) is also performed in order to give a maximum amount of protection to the plants so that the customer will receive them in perfect condition. Bearing-age plants will more than pay for the slight difference in cost.

**SPECIAL ANNOUNCEMENT TO ALL HOME GARDENERS**

Quick fruiting results, the first season set, make Bearing-Age plants specifically adapted for home growers. And, too, Raspberry, Blackberry and Dewberry plants will produce excellent crops every year from three to five years from original planting, thereby providing your table with plenty of fresh, delicious berries directly from your own garden at an amazingly low cost. Bearing-age grapes bear from eight to twelve years. Be sure and include some of these Bearing-age plants in your next order, and to make sure your garden is complete, don’t forget our Fall-bearing varieties in order to have fruit from early Spring clear through to November.

# VEGETABLE PLANTS

## TOMATO PLANTS

Grown from Ferry-Morse certified seed. Our big vigorous plants are sprayed regularly and come to you free from all disease. Plants ready for shipment April 15th; numbers after varieties named shows days to maturity.

- **EARLIANA** - 64 — The earliest ripening tomato, valuable for home garden and early market. Our strain superior in earliness and quality, medium size globe shape, deep scarlet red.
- **GARDEN STATE** - 84 — Plant vigorous and partly resistant to wilt and late blight, this grand variety developed by a large seed company of New Jersey. Fruits flattened globe shape, thick skin, very attractive bright color.
- **MARGLOBE** - 75 — Our strain is superb of this old favorite, fruit uniform, valuable for canning and shipping. Bears large crops, deep scarlet, fruit globe shape.
- **RUTGERS** - 73 — Highly recommended as a second early maturing variety for canning and tomato juice, probably grown more extensively than any other variety of tomatoes.
- **STOKESDALE** - 70 — Fruits large, sub-globe shape, smooth and well colored. Where length of growing season is less than average, then this variety is the best.

## ONION PLANTS

Grow big, early onions from our frost-proof plants for sweetness and mildness of flavor. After transplanting these plants, they will withstand temperatures of 20 degrees above zero. Plants ready for immediate shipment.

- **YELLOW BERMUDA** — Most widely planted variety, grown in Texas for early market, will produce in any climate. Light straw colored, flesh white and mild.

### CRYSTAL WAX BERMUDA — Similar to Yellow Bermuda, except skin which is pure white. A very popular variety for home and market.

### YELLOW SWEET SPANISH — Best of the very large mild varieties, good keeper, deep amber orange and globular shape.

### WHITE SWEET SPANISH — Similar to above except that the skin is white. Globular shape.

### EARLY YELLOW GLOBE — Ready for harvest normally 2 weeks ahead of other yellow varieties. Vigorous, and productive, excellent globe shape.
HEAVY Rooted Weather Hardened Dependable Yielders Guaranteed!

CABBAGE PLANTS

Frost Proof Cabbage Plants that have been winter hardened in the fields will save you 3 to 4 weeks growth on tender seedling plants. All of our plants are grown from Ferry-Morse certified seed. These plants will carry over without injury in temperatures as low as 20 degrees above zero after transplanting.

- **EARLY JERSEY WAKEFIELD**—62—Extremely early variety, very valuable for home and market. Heads conical, firm, and weighs 2 to 2½ lbs.
- **COPENHAGEN MARKET**—66—Our Select strain is extra early, ideal for early market, valuable as an early kraut variety. Heads uniformly round, firm, usually weigh 3 to 3½ lbs., inside clear white with excellent quality.
- **CHARLESTON OR LARGE WAKEFIELD**—71—Valuable home and market variety, heads broad heart shaped, 8 in. long, firm, weighs 4 to 5 lbs.
- **JERSEY QUEEN (YELLOW RESISTANT)**—62—About the same type as Early Jersey Wakefield, exceptionally resistant to yellows, and we recommend the variety to commercial growers where they are troubled with yellows in cabbage.

SWEET POTATO PLANTS

We grow millions of sweet potato plants. There is usually not enough plants to go around; thus we urgently request that you place your orders as early as possible for vegetable plants.

- **PORTO RICAN**—An extremely sweet flavored variety when thoroughly dried out before cooking, it is a Yam type of potato and is one of the best flavored potatoes for home use that is grown today. Plants ready for shipping about May 20th.
- **MARYLAND GOLDEN**—Specifically good for northern climates because of its early maturing habits. Its coloring is a rich yellow that remains with the potato even after cooking. It is a medium wet type of potato and is grown on a large commercial scale along the Atlantic seaboard. Plants ready about May 25th.

PEPPER PLANTS

These plants will be ready for shipment about May 10th. Figures after varieties named show date of maturity counting the days from setting plants.

- **CALIFORNIA WONDER**—72—A sweet pepper that is the standard of excellence. Commercial growers set more plants of this variety than any other sweet pepper. Plants a good grower, fruits very large, smooth and uniform shape, commonly 4½ in. long and 3½ in. through. Deep green becoming bright crimson when left on the vines.
- **RUBY KING**—65—Standard sweet pepper for home and shipping. Fruits large 4½ to 5 in. long and 2½ in. through, early fruit deep green becoming bright red as season progresses.

CAULIFLOWER

SNOWBALL—
The most popular early strain of Snowball Cauliflower. Plants of medium height with rather waved and crumpled leaves, inner leaves covering head well, foliage is medium green. Heads a good depth of solid ivory white and fine quality. From the date plants are set, about 55 days to mature.

SNOWBALL X—Adapted for use under wide range of conditions. Considered the most satisfactory strain for fall harvest. Heads are large, smooth, very deep, and solid, pure white, 65 days to maturity.

BROCCOLI

Plants ready for shipment about May 20th.

- **CALABRESE, EARLY GREEN SPROUTING**—First heads usually ready for cutting in 55 days from date plants are set. Vigorous grower, firm and large compact central heads, popular item for the home garden as well as for the market gardener.
Season-to-Season Profits With One Investment

Select Strain ASPARAGUS

Plant These Varieties for Your Permanent Vegetable Crop!

- **PARADISE**—This sensational new variety is drawing raves wherever it is planted. Growers are amazed to see the straight, large stalks that grow from roots seen the previous Spring. Top quality crisp, tender stalks and exceptionally mild flavor, pays off at harvest time. Make sure your garden or farm acreage includes this new and superior money maker.

- **MARY WASHINGTON**—Truly the "blue-blood" of the Asparagus world. Its extra heavy crowns and strong giant stalks have made it exclusive with commercial growers. Mary Washington is an exceptionally strong grower, its stalks are a rich green in color, and are as tender as can be. This much in demand variety is considered to be highly rust-resistant.

- **MARTHA WASHINGTON**—A result of select strain breeding, this versatile strain contains much of the original Washington characteristics, in addition to having a heavier stalk, being a better producer, and being practically blight-resistant.

Townsend's Select Strain RHUBARB

- **McDONALD**—You'll want some of this new, early producing, red, sweet rhubarb. Originated in Canada, McDonald outyields most other varieties. Milder to the taste, McDonald produces stalks two feet tall that are red all the way down.

- **GIANT CHERRY**—This colorful rhubarb, a cherry red along the entire length of the stalk, was originated in California, and the stalks are so tender that they need no peeling when cooked. The stalks are extra large and less acid and better flavored than most varieties.

- **MYATTS LINNAEUS**—An early variety possessing a tangy flavor making it admirably suited for pies and sauce. Produces big crops of large tender stalks.

Rhubarb Prices

- McDonald and Giant Cherry: Each 50c; 3 for $1.65; 100 for $5.75; 500 for $23.75.
- Myatts Linnaeus: Each 75c; 3 for $2.00; 25 for $6.25.
- Queen: Each 50c; 3 for $1.50; 100 for $17.50.

Townsend's HORSE RADISH

Set it Once - Thrives for Years

Now it is possible to grow your own "fresh horseradish" in your back yard. Once planted will last for years, giving you a continuous supply, for your table as well as to your friends. Just plant the roots in any garden soil and after the first year's growth you can cut off a few roots from each plant then grind them up, for your home product.

Home grown Bohemian horseradish is superior, because it is fresh and pure. Set the roots about 6 inches apart, maintains beautiful bluff foliage.

Place your order today — we will ship at the proper planting time.

Prices: 6 for 49c; 12 for 79c; 25 for $1.39; 50 for $2.48; 100 for $4.44; 200 for $7.49; 500 for $16.98; 1000 for $32.50.
Widow of the Founder Active In Business

Widow of the founder of the original Townsend nursery, Mrs. E. W. Townsend, Sr., the mother of L. Sherman Townsend, Manager of Townsend Nurseries, Inc., at 69 years of age is still actively engaged in the job that she started as far back as 1900. This is an example of the down-to-earth personalized type of organization that services Townsend customers. A service that has become famous over many years for integrity of purpose and faithfulness of intent.

L. Sherman Townsend

In the growing season you will find him on the farms, producing top quality plants and trees. Spring shipping season will find him in the fields and Nursery Packing Houses, supervising the digging and packing thousands of orders for prompt shipment.

DIGGING AND CLEANING PLANTS is done by experienced labor. Only the plants showing abundant foliage and vigorous growth are retained for shipment. Digging capacity as much as 1,500,000 a day.

DAILY SHIPMENTS of plants dug the same day. This is a typical scene depicting daily activity at Townsend Nurseries, Inc.

Prompt 24 Hour Service. INTEGRITY • RELIABILITY • HONESTY
Strawberry CULTURE

Directions

Write us if you are confronted with any special problems.

Too Deep  Too High

Keep the plants in a cool place like a cellar for a day or two, if you find that the plants will have to be kept out of the ground longer than two days, then place them into cold storage where the temperature is about 32 to 40 degrees.

MATING VARIETIES. All varieties of berry plants that we offer are perfect flowering, and thus will produce a full crop when planted alone. Varieties will not mix, when planted side by side.

MULching STRAWBERRIES

In regions of heavy snowfall Strawberries should have a mulch to keep the ground from freezing and thawing in early winter and in the spring. In the Northern part of the Middle West all varieties should be provided with the ground against severe drying winds, which occur in those regions. A mulch conserves moisture in the spring and in certain localities the crop may be increased from one-third to one-half by its use.

The mulch should be applied as soon as the ground is frozen from one to two inches deep. In some localities growers have found it unsafe to await freezing weather because of the danger of severe storms or heavy falls of snow which remain throughout the winter. Mulching put on as soon as active growth has ceased. The mulch should be scattered over the fields so that some will fall on the plants, but more of it between the rows. In the spring the plants will grow up through the straw and the berries will be kept clean. If mulch is put on heavy, some of it should be raked off into the rows as soon as the time growth starts. Wheat, rye, oats and buckwheat straw are more commonly used. From 2 to 3 tons of straw is required per acre. Marsh hay is also used to advantage when obtainable, 1 to 3 tons per acre being required.

ONE OF THE SECRETS

In Growing Strawberries

While there should be no secrets in the growing of Strawberries when every grower is exchanging ideas with his neighbors, there seems to be one point that has not been given enough publicity by the neighbors, journals and nurseries. With the majority of the plant growers in the North it has always been a practice to hold off setting plants until all frosts and freezing is over. On low spring type soils this probably is a logical practice. However, on land with a good drainage and which dries out early in the spring this practice should not be followed. Strawberry plants, when properly grown and hardened, will stand considerable cold weather after setting.

● Complete Culture Guide on Small Fruits Will Be Sent Free to Anyone Requesting This Booklet

VARIETY SELECTION. Perhaps the most important task in berry growing is proper variety selection. Every single variety listed has been thoroughly tested throughout the nation. We will not list a variety until we have had this variety tried for several years, under various conditions. Therefore a careful study of variety recommendations in this catalog will eliminate the possibility of purchasing varieties that are not profit makers if you are growing berries for the commercial market, or a complete success in your home garden. At any time that you are in doubt as to variety selection just write Townsend Nurseries.

SOIL PREPARATION. Strawberries are very easy to grow, but like other growing plants, prefer fertile soil. Strawberries usually do well after vegetable crops, and we prefer the land to be plowed deep in the fall or early in the spring for commercial plantings. Plantings in the home garden the soil can be plowed or spaded to a depth of about seven inches in the early spring. Potato fields, tomato and bean fields are fine for strawberry growing after these crops.

Barnyard manure, of course is fine when broadcasted over the soil in the late fall or winter months and plowed under, or worked throughly into the soil after the land is plowed. We find that a complete fertilizer mixture of about 4-8-5 and 5-10-5 analysis, (either one) applied on the soil after it has been plowed or worked up, at the rate of 1,000 to 1200 pounds per acre, and then disc or worked into the soil, AT LEAST TWO WEEKS BEFORE PLANTS ARE SET. Three weeks is much better. Now in the home garden this would be applying the fertilizer at the rate of 21/2 pounds per 100 square feet, using the same system as described above. After the fertilizer is broadcasted and worked into the soil for two to three weeks, then you are ready for your plants.

SET PLANTS IN ROWS. For commercial plantings mark your rows 3 1/2 feet apart some growers prefer 4 feet, with either a row marker or other equipment suitable. The plants can be set in with either a hand trowel, spade, or on a large scale planting with horse drawn transplanter, as well as larger tractor transplanter. Which ever means you set the plants, make the plants in the field, but always pack the soil firmly around the roots, and set the roots of the plants straight down into the deep soil, keeping in mind that the top of root near the crown of the strawberry plants should arrive, and with the ground, this one point is important, but of course very easy to take care of in the process of setting plants.

TIME TO PLANT. Every grower is just about insured with top success with berry plants when they are set into the soil in the very early spring. Mean that as soon as the first days come along that you can prepare your soil in the Spring, do so, so that your soil will be all ready when the plants arrive. Townsend strawberry plants are hardy, and will stand any freezing weather that you might have after transplanted in the Spring, since our plants are all winter hardened in the fields.

CARE OF PLANTS ON ARRIVAL. Townsend plants come to you properly cleaned, and packed into next bundles, ready to set in your garden or field. Our plants are grown on deep loose fertile soil, and the full length of the root system you will receive. When the plants are set with a spade the roots going down straight into the soil, you can leave all the roots on the plant. When the setting is done by a garden trowel or transplant the roots will have to be trimmed by clipping off a portion of the ends with a sharp knife. Leaving the roots about 6 inches long, so they can be planted straight down into your soil.

Set the plants about as far apart as possible when they arrive, dampen the roots just before setting, and keep the wind and Sun from the roots, by keeping your plants covered and keep them moist.

In case you cannot set the plants on arrival, then open the package or crate which ever the case may be, and unpack the shipment. Dampen the roots of the plants but not the foliage.
**Strawberry Culture Directions -- Continued from Page 48**

**TILLAGE.** Tillage in newly planted strawberry fields or the garden should start within ten days after the plants are planted into your soil. In commercial plantings, horse drawn cultivators are used, also garden tractors and light two row tractor cultivators. In the home garden, a small hand cultivator with two handles works very nicely. Plants should be hand hoed after the first cultivation, so as to break any crust that may form and to preserve moisture. Strawberry plants should be either cultivated or hoed every week or ten days, until the bed is formed about 30 inches wide, then usually the hoe work drops out about mid-July and the cultivator will take care of the cultivation. Keep all weeds and grass out of your strawberry patch.

*Removal of the flowers,* which is done in spring and fall, is done by the gardener, not by the cultivator. For this, it is necessary to have a sterilizing powder or other means of removing the blossoms.

**OVERBearing VARIETIES AND BLOSSOMS.** Keep all blossoms removed from your newly set plants until the Later Part of July. This will let your plants become established quickly. After this date let the blossoms remain on the plants and they will form into berries for your late Summer and Fall harvest.

**FERTILIZING IN THE FALL.** Applying an application of 5-8-12 commercial fertilizer on your strawberry field in the fall will make the grocer larger profits than spring fertilizing. We have found that an application of the above fertilizer at the rate of 800 to 1,000 pounds per acre, applied on the beds the latter part of August up until September 10th, will make your fruit buds in the strawberry plants larger, and at the same time make you more fruit buds, for your coming Spring berry crop.

Apply the fertilizer, on the foliage when the foliage of the plants are PERFECTLY DRY, and then use a bush or burlop rag and gently brush the fertilizer off the plants foliage, so fertilizer will not burn the plants. In the Spring apply only 400 pounds of a 6-8-6 fertilizer to the acre, when the plants are dormant, usually about MARCH 1st, in normal Spring.

The home gardener can use the same practices as described above for field culture using 6-8-6 fertilizer per 100 square feet of space planted to strawberries. In the Spring apply about ONE POUND per the 100 square feet. For the home gardener, when there has not been any fertilizer applied to the strawberry beds in the FALL, then we recommend 3 pounds of 6-8-6 fertilizer applied in the late winter or very early Spring, before the buds start growth.

When the above mixtures are not available in fertilizers, we recommend that you use VIGOIO, adding 30 percent more than you do the above mixtures.

---

**Territorial Adaptability of Townsend's Varieties Strawberries**

Varieties marked with * are the leaders and ones most widely planted.

**TOWNSEND SELECT-STRAIN PLANTS ARE GROWN THROUGHOUT THE NATION AND ARE KNOWN FOR THEIR HARDINESS AND BIGGER YIELDS "AT NO EXTRA COST"**

**OUR 48 YEARS EXPERIENCE IN BERRY CULTURE IS AT YOUR SERVICE**

WORLD'S LARGEST GROWERS AND SHIPPERS OF STRAWBERRY PLANTS
Especially developed by Townsend to meet the great demand for a truly later than late berry. Xtralate not only fruits later than any known existing strawberry, but has proven itself to be one of the heaviest yielding and hardiest varieties on the market. For added profits, we strongly urge the planting of this variety. Thousands of planters have been amazed at the sight of this plant laden with fruit when all other varieties are through — why not you.

NO OTHER STANDARD VARIETY IS AS LATE AS XTRALATE

- **COLOR**—Rich, bright red
- **SIZE**—Large to Extra-Large
- **QUALITY**—The Very Best

Chesapeake

**AN OLD FAVORITE**

late variety, sure cropper, excellent shipper. Does not discolor after picking, retains bright rich red color for several days. Berries large to extra large, distinctive high quality which brings top market prices.
CROSS between Aberdeen and Fairfax and has been tested about 7 years in various parts of the United States under the supervision of the U. S. Department of Agriculture, known as variety No. 3205 at the time. It is an early berry, rather large, bright red fruit. Fairland is very productive, good plant maker. Berries are firmer than Catskill and Premier, being not as firm as Temple. It was held back for commercial production in this area, but so many other states testing Fairland, liked this variety so well that the Department of Agriculture more or less had to name it and to release the variety for propagation.

Fairland resists red stele disease and is a very favorable variety for most sections of the country, where strawberries are grown when the shipping distance is not an important factor. We recommend a few plants of this variety in every one's back yard garden and feel that every commercial planter should grow a few thousand Fairland.

The Arrowhead strawberry is being introduced as a new variety, because of its plant characteristics of hardiness, vigor and runner setting ability and its fruit qualities of attractiveness, large size and desirability for market, FREEZING and jam making. It is June bearing variety, medium productive, whose time of harvest is mid season to medium late.
## TRUE TO NAME PLANTS 1949 PRICES GUARANTEED SATISFACTION

**STRAWBERRY PLANTS**

All prices quoted below are F.O.B. Salisbury, Maryland, and in effect from January 1st until December 31, 1949. Customers ordering plants sent Parcel Post prepaid. See Parcel Post Rates on page 55. We ship a limited number of strawberry plants in late summer and fall. Customers wanting plants for planting at that time, may send their order along any time after June 15th. All plants are tied 25 to bundle. No less than 25 plants of variety sold.

### WRITE FOR SPECIAL PRICES ON LARGER QUANTITIES THAN QUOTED ABOVE

Townsend's plants are used exclusively by the largest strawberry associations in the country. Any association, group of growers who wish to pool their orders, or any large grower interested in purchasing a variety in larger quantities than quoted above, should write us for our special price. When writing, just give Variety or Varieties wanted and approximately amount needed. You will be under no obligation to buy. It is part of Townsend's Service which we are rendering our customers, and which has helped us to build our business to the present standing as The World's Largest Growers—Publishers of Strawberry Plants.

ORDERS CAN BE BOOKED IN ADVANCE OF SHIPPING DATE. You can send along your order on receipt of this catalogue. A 25% deposit will reserve stock to you. We will dig and ship whenever we receive your shipping instructions. Thousands of our customers annually take advantage of this service. On long lists of varieties it insures them of getting varieties wanted.
EARLY JERSEY WAKEFIELD

Our Cabbage plants are Frost-Proof, winter hardened, can be planted from February until May 1st. ALL PLANTS FRESHLY DUG—AND SHIPPED SAME DAY. GUARANTEED TO ARRIVE IN GOOD CONDITION. ANY THAT FAIL TO DO SO WE WILL REPLACE FREE.

FROST-PROOF PLANTS

50 CABBAGE Requires Only
200 ONIONS 12 x 15 Ft. Space

Dear Friend:

Your valuable inquiry asking for our new Berry Book was received this morning and I want to thank you for the opportunity given us to serve you. This Free Berry Book is going forward in today's mail and I hope it reaches you promptly.

The writer and his associates have spent considerable time checking the varieties of fruits that are offered in this book. And we realize the importance of listing only varieties of outstanding merit that will give our customers the best yields when grown over a wide range of soils and climates.

From the thousands of reports received from our customers annually and with the kind help of various State agricultural colleges, Government agricultural officials and our own extensive trial grounds, we are positive that the varieties of berry plants and other items offered in this new book provide the most complete assortment of the truly outstanding varieties on the market today, and will give you the best yields when grown under ordinary average conditions. You can order any variety in our book with full confidence that they will be satisfactory.

While we have tried to give you as accurate description and as complete growing information as space in our catalogue will allow, I want you to feel free to write me at any time that you may have problems in fruit growing. I will do my best to help you.

I want you to know that I appreciate receiving your inquiry and will be just as pleased to have further opportunities of serving you whenever the occasion arises.

With kindest regards, I am

Sincerely yours,

TOWNSEND NURSERIES

L. Sherman Townsend, Agr.
